

Boxes for dry fountains

BOX 283

AISI304 | AISI316 | Ø 283 mm | EASY MOUNTING | INFINITE LIFETIME | LIGHTS UNDER PLATE | WALKABLE | MADE IN ITALY

- Made of AISI304 stainless steel (AISI316 on request)
- 283 mm diameter
- Bottom electrical and hydraulic connections
- 1 or 2 adjustable lights under the plate, with vandal resistant protection
- Support ring
- Walkable upper plate (suitable for vehicles passage on request)

Box for dry fountains, made of AISI304 stainless steel, to be floor built-in.

Dimensions: 250 mm high (connections included) – 283 mm of max diameter – 5 mm thick upper walkable plate.

Complete with both hydraulic and electrical bottom connections: this allows for an unconditioned positioning of the box and a height sufficient to stabilize the water flow. Available connections:

- one or more 1” F electrical inlets for the underwater lights;
- one 1 ½” F nozzle inlet;
- one 2” F drain outlet.

Suitable for nozzles: Cometa Plus 16/17/18/20 – Spumeggiante 32.

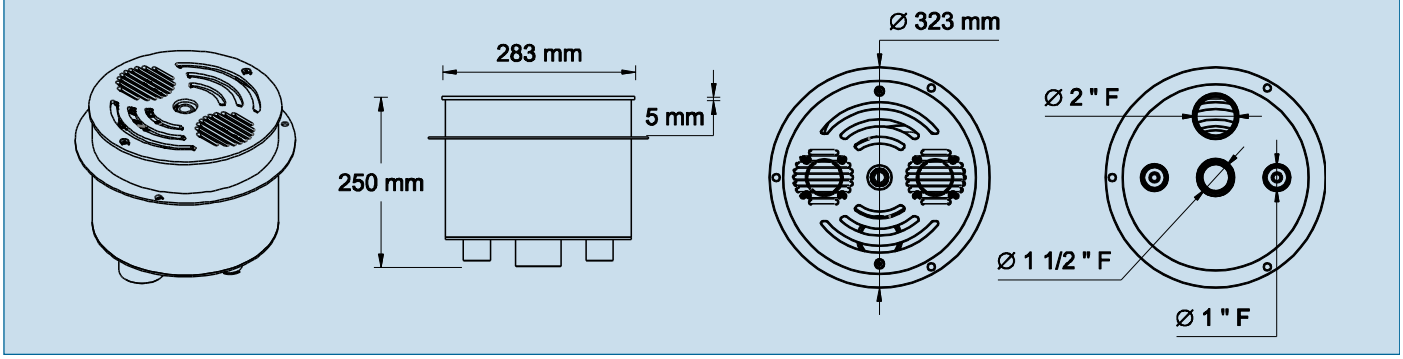

Provided with 1 or 2 Mizar underwater LED fountain lights mounted under the plate, with the following advantages:

- light protection against acts of vandalism;
- possibility to direct the light towards the water jet;
- absence of water and limestone deposit on the light glass.

Provided with support ring used both to avoid deformations of the box or structural failures next to it, and as a regulation device to allow for a precise positioning of the box.

Upon request, it can be made of AISI316 stainless steel, with plate suitable for cars passage, with lights mounted at plate level, support ring with “water stop” function and stainless steel frame suitable for the paving used.

DIMENSIONS

	BOX 283
NOZZLE	CO16 / CO17 / CO18 / CO20 / SP32
