

Boxes for dry fountains

BOX 500

AISI304 COMPOSITE | AISI316 COMPOSITE | Ø 500 mm | EASY MOUNTING | INFINITE LIFETIME | LIGHTS UNDER PLATE | WALKABLE | MADE IN ITALY

- Made of AISI304 stainless steel (AISI316 on request) and composite material
- 500 mm upper plate diameter
- Bottom and lateral hydraulic and electrical connections
- 1-4 adjustable lights under the plate, with vandal resistant protection
- Available in the dynamic version
- Walkable upper plate (suitable for vehicles passage on request)

Box for dry fountains, with body made of composite material and AISI304 stainless steel upper plate (AISI 316 on request), to be floor built-in.

Available in 3 versions: a classic version with nozzle and lights and two dynamic versions with switching device for ON-OFF dynamic water effects (see V-Fast100 Pneumatic Valve and HD100 Water Switch).

Dimensions: 507 mm high – 500 mm of max diameter – 5 mm thick upper walkable plate.

Available connections:

- one or more 1” F lateral electrical inlets for the underwater lights and the switching device in the dynamic version;
- one 1” F lateral air inlet in the V-Fast100 version;
- one 1 ¼” M – 1 ½” M – 2” M nozzle bottom inlet;
- one 2 1/2” F lateral drain outlet.

Suitable nozzles: Cometa Plus and Spumeggiante as per table.

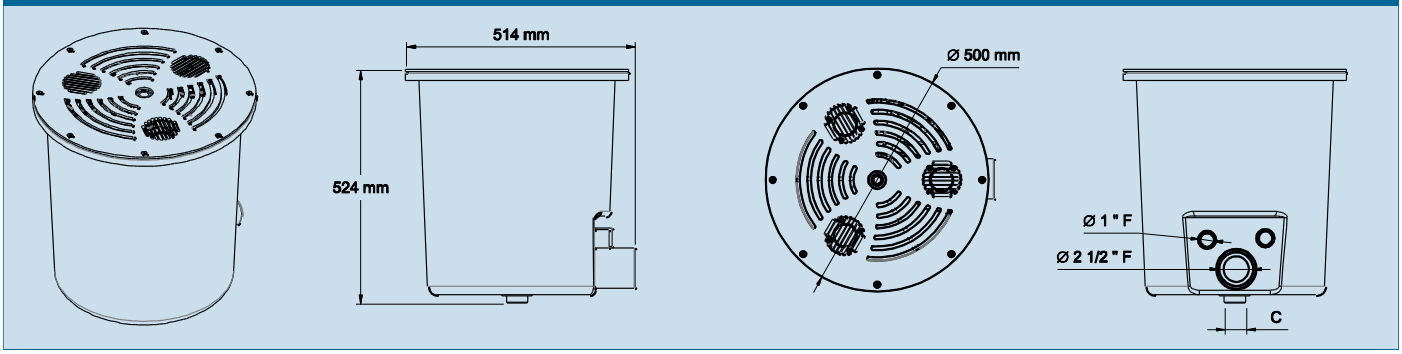

Provided with 1 up to 4 Mizar underwater LED fountain lights mounted under the plate, with the following advantages:

- light protection against acts of vandalism;
- possibility to direct the light towards the water jet;
- absence of water and limestone deposit on the light glass.

Provided with upper anchoring flange used also as a regulation device to allow for a precise positioning of the box.

Upon request, it can be made with AISI316 plate and suitable for cars passage, with lights mounted at plate level, “water stop” device and frame suitable for the paving used.
