

Hydraulic accessories for fountains

FLOOR DRAIN

AISI304 Composite | AISI316 Composite | PROTECTION GRILL | EASY CLEANING | MADE IN ITALY

- Framework and protection grill in AISI304 stainless steel (AISI316 on request)
- Body in composite material
- Compact size
- Lateral drain connection
- Available also with extractable basket

The floor drain for fountains, ideal to empty tanks and reservoirs, is made of composite material, with framework and grill in AISI304 stainless steel (AISI316 on request).

The short height (21 cm max) and the lateral connection allow its installation at floor level, greatly simplifying the installation and its connection to the drain pipe. This allows also to have the composite body built-in, while keeping visible the only framework and grill.

Also available in the versions with the extractable basket, in order to simplify its cleaning.

Threaded or gluing drain connection.

Bottom connection and different dimensions upon request.
