FLOOR OVERFLOW PIPE

AISI304 BRASS | AISI316 BRASS | MADE IN ITALY

- Made in AISI304 stainless steel (AISI316 on request) and brass
- Floor mounting
- Different height on request

The floor overflow pipe, made of AISI304 stainless steel and brass, avoids the accidental overflow of the fountain tank caused by possible malfunctions of the replenishment system or by an excess of rain.

It is particularly useful for nozzles needing a maximum water level for a correct functioning.

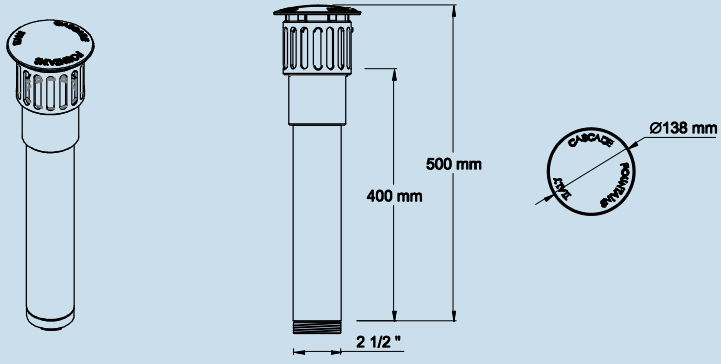

Especially useful when it is neither possible to work on the tank's walls nor to use a Built-in overflow pipe.

Standard height of 50 cm. Different height and AISI316 stainless steel upon request.

It is recommended the use of the 2 ½" regulation flange.
