FLOOR OVERFLOW PIPE WITH DRAIN

AISI304 BRASS | AISI316 BRASS | MADE IN ITALY

- Made of AISI304 stainless steel (AISI 316 on request) and brass
- Floor mounting
- Different height on request

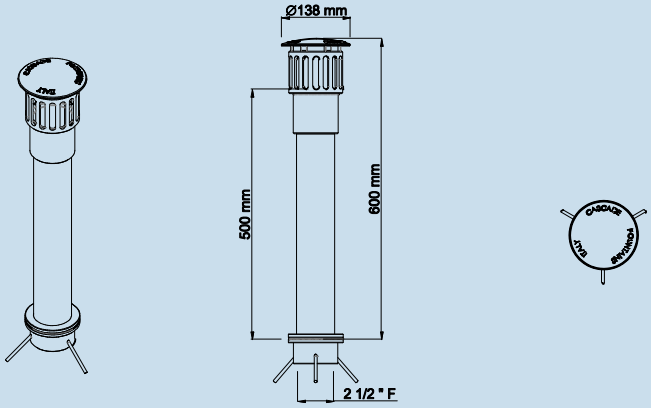

The floor overflow pipe with drain for fountains, made of AISI304 stainless steel and brass, avoids the accidental overflow of the fountain tank caused by possible malfunctions of the replenishment system or by an excess of rain. It is made up of the floor overflow pipe and a stainless steel base, with drain function, to be floor built-in, useful for existing plants in which there is a unique drain pipe.

Standard water level of 50 cm, different height and AISI316 stainless steel upon request.

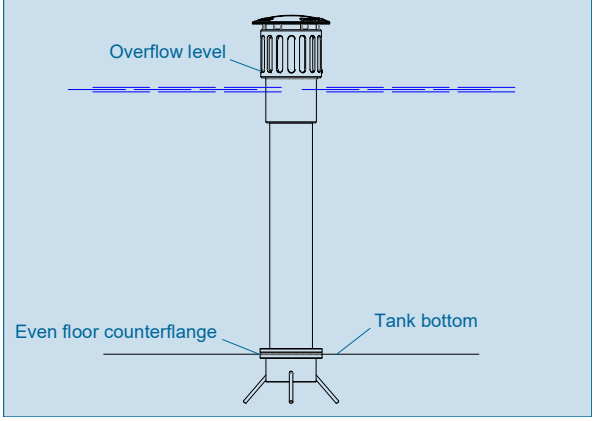

Upon request, it can be provided with two lateral levers to open and close the drain.
