

Electrical accessories for fountains

IP68 UNDERWATER JUNCTIONS

BRASS | PVC | AISI316 | IP68 | MADE IN ITALY

- In PVC and nickel-plated brass (AISI316 stainless steel cable glands on request)
- Available in two versions
- Small dimensions
- IP68 - watertight - for permanent immersion

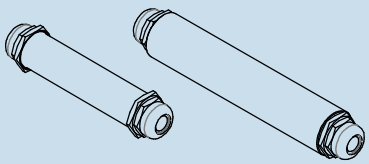

Made of brass / stainless steel / PVC, the IP68 permanent immersion underwater junctions are designed and studied to guarantee watertight integrity and allow extremely reliable underwater electrical connections, such as for Mizar underwater LED lights and 24 Vdc submersible pumps for fountains.

Nickel-plated brass cable glands included.

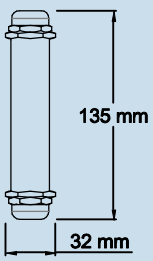

Upon request, the cable glands can be supplied in AISI316 stainless steel.
