

LED dots for lighting columns

PNT1W

NICKEL-PLATED BRASS | PMMA | 1 W | LED | IP67 | 300 mm CABLE | MADE IN ITALY

- Made of nickel-plated brass and PMMA
- 1 W LED
- 300 mm cable
- IP67 protection
- Works with external driver

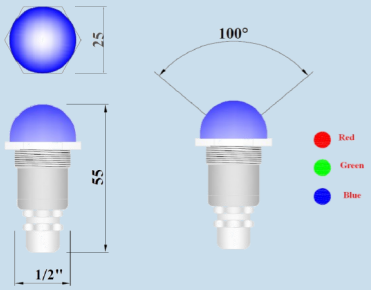

Bright decorative LED elements extremely small. They can be used for street lighting, in garden decoration or in applications requiring discrete and non-invasive signaling.

Despite the small dimensions, they share all the mechanical features of a professional product.

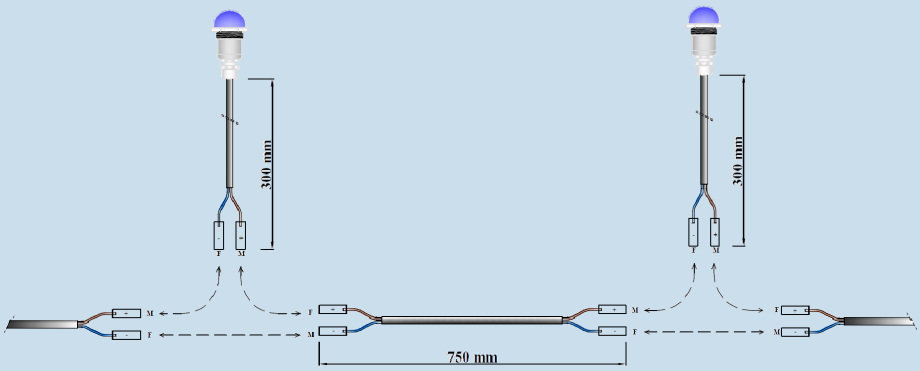

Easy to maintain, they can be used individually or connected in series thanks to a special driver. The typical driver output voltage is 24 Vdc; greater voltage according to the number of dots connected with the same driver.

The functioning of the dots series is always guaranteed even in case of fault of one component.

DIMENSIONS

APPLICATION

	PNT1W LED DOT
CODE	**PNT1W**
EMITTING DEVICE	Power LED
POWER	1 W
POWER SUPPLY	With driver
LED COLOUR	Standard: Monochrome Blue (On request: Green / Red)
CABLE	2 x 0,5 mm^2 - Length 300 mm
MATERIAL	Nickel-plated brass and PMMA
PROTECTION	IP67
CONNECTION	1/2 " GAS
