

LED tips for lighting columns top

PL20060 LED TIP

PEHD / PA66	GU10 LED	3 W	FOR 60 mm TOP	CLASS II	10 m CABLE	MADE IN ITALY

- Tip made of PEHD
- Lamp support made of PE66
- For 60 mm top columns
- 3 W GU10 LED lamp
- 10 m cable
- Isolation class II
- Available colours: Red - Blue - Green - White

Bright LED tips, used as decorative terminal elements on street lighting columns or decorative lighting. They adapt to any column with a top diameter of 60 mm. The fastening on the column is done using screws which ensure a secure and stable connection in time; the diameters on top of the column are such that it is entirely covered, thus avoiding also possible water infiltration inside the column.

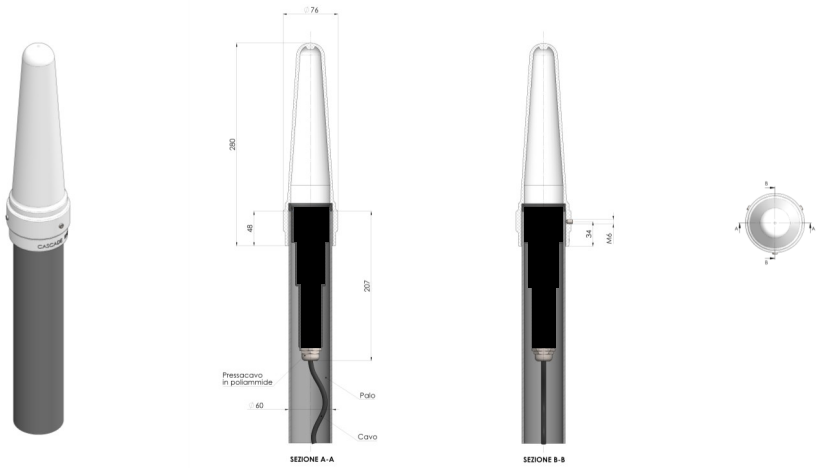

The bright LED tips for lighting columns top are easy to install and, above all, easy to maintain since they exploits standard interchangeable LED lamps with GU10 connection. The lamp is available in commercial colours, with standard 3 W power. Upon request, if available, also greater powers.

The natural PEHD material is UV stabilized and its thickness guarantees a high mechanical resistance.

The internal adapter makes the cable-lamp cabling simple and secure, with standard 2 x 0,75 mm2 cable, length 10 m.

Devices with isolation class II.

DIMENSIONS AND APPLICATION

	PL20060 LED TIP
CODE	**PL20060**
COMPATIBLE TOP COLUMN DIAMETER	60 mm
LAMP	GU10 LED (interchangeable)
LAMP SUPPLY VOLTAGE	230Vac without driver
LAMP POWER	3 W
LAMP COLOUR	Monochrome Blue - Red - Green - White
CABLE	2 x 0,75 mm^2 - lenght 10 m
TIP MATERIAL	PEHD natural (white)
PROTECTION	IP67
ISOLATION CLASS	II
