VULCANO 300

100% METAL | PLASTIC FREE | INFINITE LIFETIME | MADE IN ITALY

- Made of AISI304 and AISI316L stainless steel
- Big water volcano on 3 levels
- Crystalline water jets
- Independent from the water level

The Vulcano 300 is a fountain nozzle made of stainless steel and it is independent from the water level.

The nozzle consists of a cylindrical manifold on which are mounted 19 directable nozzles, of which 18 Cometa 8 and 1 Cometa Plus 12.

The effect is a set of hefty crystalline jets creating a water volcano on 3 levels.

TIPS FOR USE AND APPLICATIONS

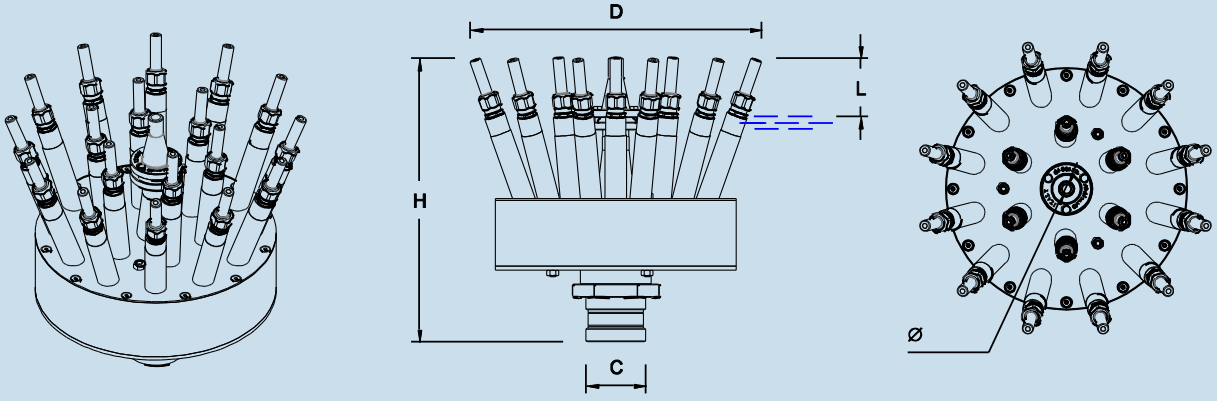

The Vulcano 300 works with more significant heights, up to 7 m.

Ideal for medium and large basins (see the PREASSEMBLED FOUNTAINS WITH TANK section).

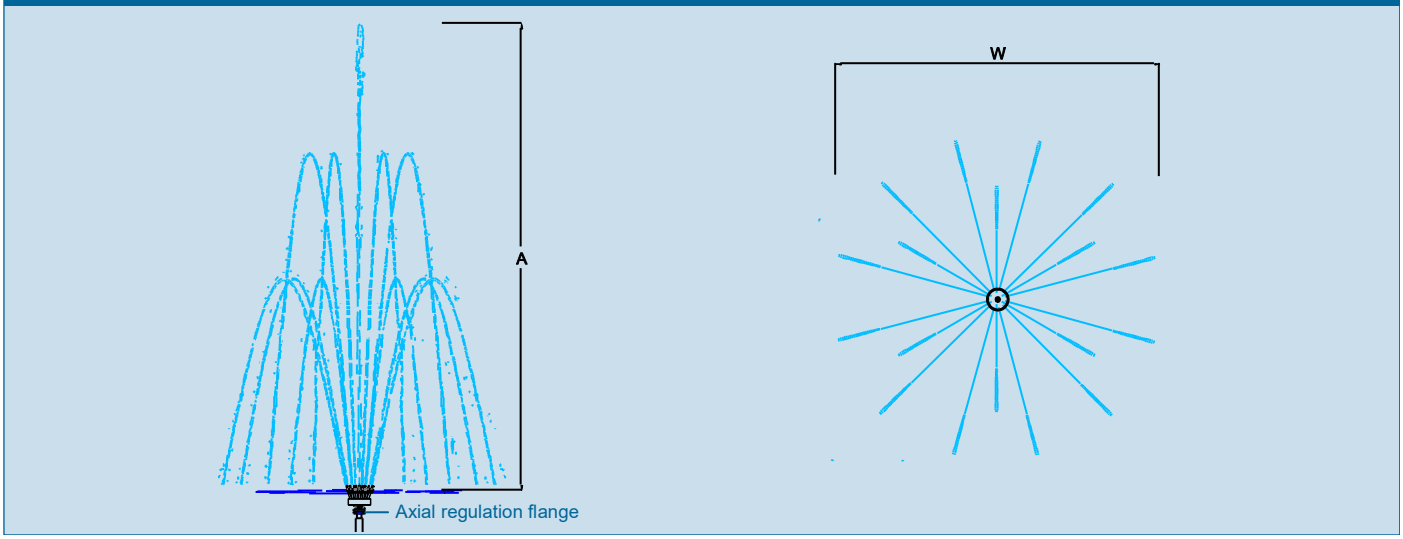

We suggest the use of the axial regulation flange.

Underwater lighting: to enhance the water effect with monochrome or RGBW lighting features we recommend the use of the Mizar underwater LED fountain lights, professional products specific for fountain illumination, of refined design, cutting-edge technology and amazing lighting outcomes.
